

Francis Torque Service offers hydrostatic pressure testing services to the drilling and production industry, as well as to plants, refineries, pipelines and construction facilities in the Gulf South. We provide trained, experienced personnel, diesel pumps with **capacities in excess of 20,000 psi** or air powered, portable units with capacities in excess of 10,000 psi.

**Air Powered  
Two-Stage "Piggy Back"**

**Diesel Powered - Four Speed**

**Diesel Powered Pumps** - With four speed transmissions to provide higher pump volume and time savings to the customer.

**Air Powered Pumps** - (Piggy Back) Compact, portable, two-stage pumps ideal for lower volume and rental applications.

**Accessories** - Test plugs, crossover subs, pressure recorders, temperature recorders, digital dead weights, calibration certificates and more.

**Applications - Drilling/Production** - B.O.P.'s, Manifolds, Casing and Tubing Hangers, Lubricators, Production Trees, Chemical Injection and more.

**Plants/Refineries, Fabrication/Construction** - Pipelines, Flowlines, Heaters, Exchangers, Separators, Reactors; Filling, Pigging, Gauging, etc.

**Test Plugs and Recorders**
