

Pipe/Casing Cutting

Francis Torque Service will precision machine cut and bevel any pipe or casing while maintaining the integrity of the metal. Choose from a large inventory of **Trav-L Cutters**, **Low Clearance Cutters** or **Guillotine Saws**, depending on your specific clearance and end prep requirements.

Cut and Bevel - We cold cut, machine finish and/or bevel at your request.

Large Diameter Capability - We cut most size pipe or casing in even the harshest of environments.

Air Powered - Provides portable on-site service.

Multiple Saw Options - To meet your specific applications.

- **Low Clearance Cutter** - Clamshell design, cuts and bevels most standard pipe or casing sizes.
Requires: 6" radial clearance
8" above the cut
- **Trav-L Cutter** - Cuts and bevels larger pipe or casing sizes to 72" diameter.
Requires: 12" radial clearance
21" above the cut
- **Guillotine Saw** - Cuts pipe, casing or solid stock to 18" diameter.
Requires: 2" radial clearance (one side)
12" above the cut
